

curt | desk chair

This desk chair is attractive in its simplicity. In combination with the environment it serve its purpose as a desk chair. To achive best stability, it needs to be leaned against walls or rails in a flat angle. The anti-slip coated stand provides safe grip on every surface. Even though it looks dangerous it provides comfort seating and relaxing in every occasion. The wooden frame-part is manufactured in a sheltered workshop (ALTRA).

Wood:	ash, beech
Price:	320.- EURO
Availability:	usually within 5 weeks after ordering
Website:	www.bernhard-burkard.com

About BERNHARD | BURKARD GmbH

The Swiss design studio BERNHARD | BURKARD was established in 2010 by Fabian Bernhard and Thomas Burkard.

During their time together as students they soon realized the potential that derives from the synergy of their individual skills and approaches to design. Their comprehensive experience and excellent network enables BERNHARD | BURKARD to accomplish a project from conception and formal elaboration to technical realization. Their focus lies on both innovative and creative solutions that are at the same time highly esthetic and an appropriate resource management. Design starts with a call for change. Besides technical skills it needs curiosity and the will to face the world with open eyes. Beyond styling and optical dressing contemporary design, as a process for products and communication, can generate the additional benefit that leads to sustainable success for all users.
